(57) **CLAIM**

The ornamental design for a reading light, as shown and described.

DESCRIPTION

FIG. 1 is a front, top and right side perspective view of a reading light, showing my new design;
FIG. 2 is a rear, bottom and left side perspective view thereof;
FIG. 3 is a front view thereof;
FIG. 4 is a rear view thereof;
FIG. 5 is a left side view thereof;
FIG. 6 is a right side view thereof;
FIG. 7 is a top plan view thereof; and,
FIG. 8 is a bottom plan view thereof.
The broken lines immediately adjacent the claimed surfaces depict the bounds of the claimed design, whereas all remaining broken lines depict portions of the reading light, all of which form no part of the claimed design.

1 Claim, 8 Drawing Sheets

A perspective drawing of a neck light, showing its curved shape and various components like the light source and adjustment mechanisms. The device is shown from a front, top, and right side perspective. It has a flexible, curved body with a light source at the bottom. There are adjustment mechanisms on the sides, including a dial and a switch. The drawing uses solid lines for the claimed design and broken lines for the rest of the device.
