### Description

- (1) FIG. 1 is a perspective view of a residual current monitoring and protection module.
- (2) FIG. 2 is another perspective view of a residual current monitoring and protection module.

- (3) FIG. 3 is another perspective view of a residual current monitoring and protection module.
- (4) FIG. 4 is another perspective view of a residual current monitoring and protection module.
- (5) FIG. 5 is front view of a residual current monitoring and protection module.
- (6) FIG. 6 is rear view of a residual current monitoring and protection module.
- (7) FIG. 7 is left side view of a residual current monitoring and protection module.
- (8) FIG. 8 is right side view of a residual current monitoring and protection module.
- (9) FIG. 9 is top view of a residual current monitoring and protection module.
- (10) FIG. 10 is bottom view of a residual current monitoring and protection module; and,
- (11) FIG. 11 is a reference view showing the use state of a residual current monitoring and protection module in accordance with a further embodiment.
- (12) The broken lines in the drawings illustrate portions of a residual current monitoring and protection module that form no part of the claimed design.

## Claims

The ornamental design for a residual current monitoring and protection module, as shown and described.

---
