Description

(1) FIG. 1 is a front, left and bottom side perspective view of a first embodiment of a puncture instrument for drug administering device, showing our new design;

(2) FIG. 2 is a rear, left and top side perspective view thereof;

(3) FIG. 3 is a front view thereof;

(4) FIG. 4 is a rear view thereof;

(5) FIG. 5 is a top view thereof;

(6) FIG. 6 is a bottom view thereof;

(7) FIG. 7 is a right-side view thereof;

(8) FIG. 8 is a left-side view thereof; and

(9) FIG. 9 is a cross sectional slice view taken at the section line 9 in FIG. 3.

(10) FIG. 10 is a front, left and bottom side perspective view of a second embodiment of a puncture instrument for drug administering device, showing our new design;

(11) FIG. 11 is a rear, left and top side perspective view thereof;

(12) FIG. 12 is a front view thereof;

(13) FIG. 13 is a rear view thereof;

(14) FIG. 14 is a top view thereof;

(15) FIG. 15 is a bottom view thereof;

(16) FIG. 16 is a right-side view thereof;

(17) FIG. 17 is a left-side view thereof; and

(18) FIG. 18 is a cross sectional slice view taken at the section line 18 in FIG. 12.

(19) FIG. 19 is a front, left and bottom side perspective view of a third embodiment of a puncture instrument for drug administering device, showing our new design;

(20) FIG. 20 is a rear, left and top side perspective view thereof;

(21) FIG. 21 is a front view thereof;

(22) FIG. 22 is a rear view thereof;

(23) FIG. 23 is a top view thereof;

(24) FIG. 24 is a bottom view thereof;

(25) FIG. 25 is a right-side view thereof;

(26) FIG. 26 is a left-side view thereof; and

(27) FIG. 27 is a cross sectional slice view taken at the section line 27 in FIG. 21.

(28) FIG. 28 is a front, left and bottom side perspective view of a fourth embodiment of a puncture instrument for drug administering device, showing our new design;

(29) FIG. 29 is a rear, left and top side perspective view thereof;

(30) FIG. 30 is a front view thereof;

(31) FIG. 31 is a rear view thereof;

(32) FIG. 32 is a top view thereof;

(33) FIG. 33 is a bottom view thereof;

(34) FIG. 34 is a right-side view thereof;

(35) FIG. 35 is a left-side view thereof; and,

(36) FIG. 36 is a cross sectional slice view taken at the section line 36 in FIG. 30.

(37) The even-length broken lines shown in the drawings represent portions of the puncture instrument for drug administering device that form no part of the claimed design. The uneven-

length broken lines shown in the drawings represent a boundary between the claimed portion and the non-claimed portion of the puncture instrument for drug administering device and form no part of the claimed design. The single dash lines labeled “**9**”, “**18**”, “**27**” and “**36**” in FIGS. **3**, **12**, **21** and **30** respectively, define the cut lines of the cross sectional slice view of the puncture instrument for drug administering device and form no part of the claimed design.

Claims

The ornamental design for a puncture instrument for drug administering device as shown and described.
