

US0D1090248S

(12) **United States Design Patent**
Bogdziewicz et al.

(10) **Patent No.: US D1,090,248 S**

(45) **Date of Patent: ** *Aug. 26, 2025**

(54) **CONTAINER WITH PUSH-AND-SLIDE
LOCKING MECHANISM**

(71) Applicant: **Altria Client Services LLC**,
Richmond, VA (US)

(72) Inventors: **William J. Bogdziewicz**, Richmond,
VA (US); **Christopher J. Hession**,
Mechanicsville, VA (US)

(73) Assignee: **Altria Client Services LLC**,
Richmond, VA (US)

(*) Notice: This patent is subject to a terminal dis-
claimer.

(**) Term: **15 Years**

(21) Appl. No.: **29/801,723**

(22) Filed: **Jul. 30, 2021**

(51) **LOC (15) Cl.** **27-06**

CLAIM

The ornamental design for a container with push-and-slide locking mechanism as shown and described.

DESCRIPTION

FIG. 1 is a top, front, right-side perspective view of a container with push-and-slide locking mechanism, in a closed configuration, showing the new design;

FIG. 24 is a bottom, back, left-side perspective view of the container with push-and-slide locking mechanism, with the primary lid in the opened configuration;

FIG. 45 is a top view of the container with push-and-slide locking mechanism, with the secondary lid in the opened configuration;

FIG. 46 is a bottom view of the container with push-and-slide locking mechanism, with the secondary lid in the opened configuration;

FIG. 47 is a top, front, right-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in respective opened configurations;

FIG. 48 is a top, front, left-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 49 is a top, left-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 50 is a top, right-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 51 is a bottom, back, right-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 52 is a bottom, back, left-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 53 is a bottom, right-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 54 is a bottom, left-side perspective view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 55 is a front elevation view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 56 is a back elevation view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 57 is a right-side view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 58 is a left-side view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations;

FIG. 59 is a top view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations; and,

FIG. 60 is a bottom view of the container with push-and-slide locking mechanism, with the primary lid and the secondary lid in the respective opened configurations.

While the figures do not presently include any broken lines, the inventors do contemplate broader scope of invention and changing any of the present solid lines to broken lines wherein the broken lines are for the purpose of illustrating portions of the article and form no part of the claimed design.
