

US0D1091568S

(12) **United States Design Patent** (10) **Patent No.:** **US D1,091,568 S**
Chaput et al. (45) **Date of Patent:** **** Sep. 2, 2025**

(54) **DISPLAY SCREEN OR PORTION THEREOF WITH GRAPHICAL USER INTERFACE**

(71) Applicant: **AMPJACK INDUSTRIES LTD.,**
Winnipeg (CA)

(72) Inventors: **Luke Chaput, Winnipeg (CA); Jeffrey Laninga, Winnipeg (CA)**

(73) Assignee: **Ampjack Industries Ltd., Winnipeg (CA)**

(**) Term: **15 Years**

(21) Appl. No.: **29/833,693**

(22) Filed: **Apr. 6, 2022**

(51) **LOC (15) Cl.** **14-04**

(52) **U.S. Cl.** **D14/488**

(58) **Field of Classification Search**

CLAIM

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

The sole FIGURE is a front view of a display screen or portion thereof with graphical user interface showing our new design.

The outermost broken lines in the FIGURE illustrate a display screen or portion thereof. The remainder of the broken lines within the FIGURE illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 1 Drawing Sheet

AMP/JACK Transmission Upgrades Avoid Outages and Increase Powerflow Capacity

Typical AC Powerflows for Line Voltage [KV AC]

Suggested Typical Powerflow [MW]

*If double circuit multiply by 2.

Powerflow [MW] of transmission line Value of Electricity (cents/kwh) -1 cents/kwh=1¢/kwh Duration of Outage (days)	 2200 MW	 5 cents/kwh
 30 days		

Calculate Savings Cost

Outage Cost \$

Amount saved by avoiding an outage of transmission lines during upgrade

Capacity increase (%) From Upgrade	 30 %	30 %
Assumed Annual Rate of Return on Capacity increase (%)	 2 %	2 %
Assumed Annual Rate of Escalation of Electricity Prices (%)	 6.5 %	6.5 %
Number of Years for Future Value	 20 Years	20 Years

Calculate Future Value

Future Value \$

Future value of capacity increase due to transmission system upgrade in N years
