(57) CLAIM

The ornamental design for a computer display system or portion thereof showing an animated graphical user interface having a three dimensional appearance as shown and described.

DESCRIPTION

FIG. 1 is a front view of a computer display system or portion thereof showing a first image of an animated graphical user interface having a three-dimensional appearance showing the claimed design;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof;

FIG. 4 is a fourth image thereof; and,

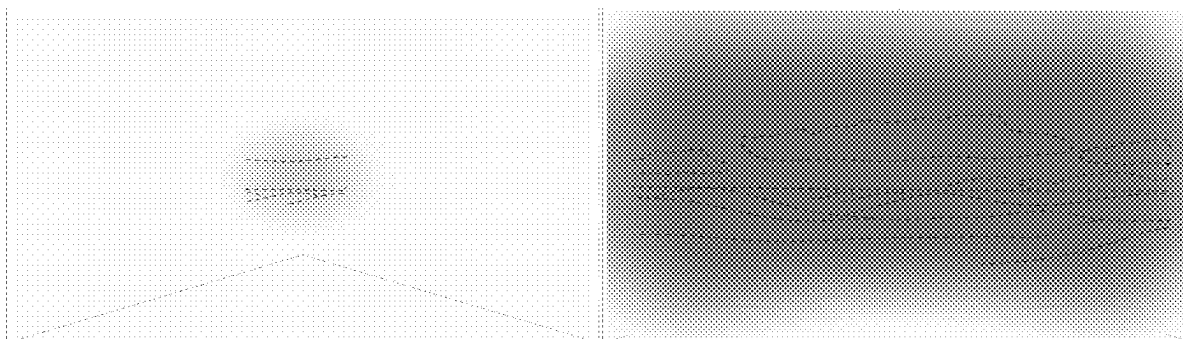

FIG. 5 is a fifth image thereof.

The outermost lighter weight dashed broken lines show the field of view of the computer display that forms no part of the claimed design. The other lighter weight dashed broken lines show a three dimensional environment within a field of view of the user that form no part of the claimed design. The heavier weight broken lines in the figures show portions of the animated graphical user interface that form no part of the claimed design.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another forms no part of the claimed design.

The gray area within FIGS. 1-5 represents an expanding portal window with faded edges.

1 Claim, 5 Drawing Sheets
