CLAIM

The ornamental design for a tire as shown and described.

DESCRIPTION

FIG. 1 is a side perspective view of a tire showing our new design, it being understood that the tread pattern is repeated throughout the circumference of the tire, the opposite side being the same as that shown;

FIG. 2 is a front elevational view of the tire;

FIG. 3 is an enlarged fragmentary view of FIG. 2 taken along the lines of FIG. 2 labeled FIG. 3; and,

FIG. 4 is a side elevational view of the left side of the tire, the opposite side being the same as that shown.

The broken lines defining the sidewall, inner bead, and the peripheral boundary between the claimed tire tread and the sidewall depict environmental subject matter that forms no part of the claimed design.
