Description

- (1) FIG. 1 is a front view of a display screen of a respiratory support apparatus or portion thereof with graphical user interface in accordance with a first embodiment.
- (2) FIG. 2 is a front view of a display screen of a respiratory support apparatus or portion thereof with graphical user interface in accordance with a second embodiment.
- (3) FIG. 3 is a front view of a display screen of a respiratory support apparatus or portion thereof with graphical user interface in accordance with a third embodiment; and,
- (4) FIG. 4 is a front view of a display screen of a respiratory support apparatus or portion thereof with graphical user interface in accordance with a fourth embodiment.
- (5) The outer perimeter broken lines in the figures illustrate a display screen of a respiratory support apparatus or portion thereof and form no part of the claimed design. The remaining broken lines in the figures illustrate portions of a graphical user interface and form no part of the claimed design.

Claims

The ornamental design for a display screen of a respiratory support apparatus or portion thereof with graphical user interface, as shown and described.
