(57) **CLAIM**

The ornamental design for an electric vehicle charger connector holder as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of an electric vehicle charger connector holder for a tethered type of an electric vehicle charger, in accordance with the present invention. FIG. 2 is a front view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention.

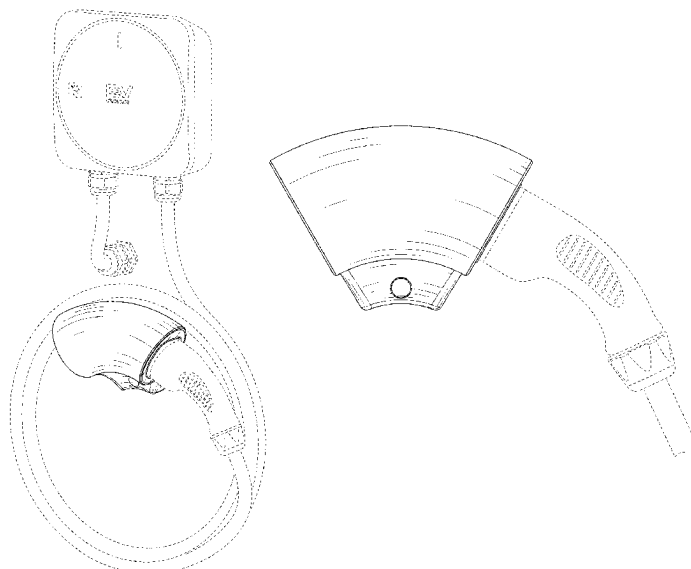

FIG. 3 is a rear view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention. FIG. 4 is a top view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention. FIG. 5 is a bottom view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention.

FIG. 6 is a right side view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention; and,

FIG. 7 is a left side view of the electric vehicle charger connector holder of FIG. 1, in accordance with the present invention.

The ornamental design is an electric vehicle charger connector holder for a tethered type of an electric vehicle charger. The broken line showing of the charger is for the purpose of illustrating environmental structure, the additional broken lines shown in FIG. 7 illustrate portions of the electric vehicle charger connector holder; all broken lines form no part of the claimed design.
