DESCRIPTION

FIG. 1 is a front perspective view of a motor wire connector housing embodying our design;

FIG. 2 is a back perspective view of the motor wire connector housing as depicted in FIG. 1;

FIG. 3 is an enlarged top front perspective view of the motor wire connector housing shown in FIGS. 1 and 2;

FIG. 4 is an enlarged top back perspective view of the motor wire connector housing as shown in FIG. 3;

FIG. 5 is an enlarged front elevation view of the motor wire connector housing as shown in FIGS. 3 and 4;

FIG. 6 is an enlarged end elevation view of the motor wire connector housing as shown in FIGS. 3-5, with the opposite end elevation view being a mirror image thereof;

FIG. 7 is an enlarged back elevation view of the motor wire connector housing as shown in FIGS. 3-6;

FIG. 8 is an enlarged top plan view of the motor wire connector housing as shown in FIGS. 21-25 3-7; and,

FIG. 9 is an enlarged bottom plan view of the motor wire connector housing as shown in FIGS. 3-8.

The broken lines are directed to environment and/or are for illustrative purposes only. None of the broken lines form part of the claimed design. The motor wire connector housing in FIGS. 1-9 is shown with a symbolic break in length and any portion between the break lines forms no part of the claimed design.

1 Claim, 9 Drawing Sheets
