(57) **ABSTRACT**

Strategy For Positive Impact is applicable in any field for positive impact, such as essential conduct for balance with progress and growth in habitat. Application of Strategy For Positive Impact on need point out wrong, such as question by example on behavior and anomaly indicate harm in environment: exploitation such as toxic bias and immorality, misfire on survival; outplay system, such as perpetration and misdirection, for deterioration. Iteration of Strategy For Positive Impact on wrong identify right action for capable, such as analysis and inquiry on harm with observation derive true conduct for balance: guard for moral rights such as spot misconduct, hoax and bias in power for punishment; aid for viable creative such as consensus on passion with ability for integrity and trust, with effort in honest direction; growth for advancement, such as inheritance of diversity and availability of factual, towards believable and virtuous progress.

Fig. 5

SPI in Psychology example #1

Why do some People talk too much?

Observation

- Often seen in people who are lonely
- Need to find right individual or group to share and learn

Issue

- a. Fear of loneliness, followed by a continuous effort to fight it
- b. Fall prey to dangers and scams
- c. Vicious struggles against loneliness

Self-Attempt

Naive thought is: If I do not talk and share how would I make friends

Evidence

- a. A malicious individual never talks too much
- b. A malicious person is aware of their wrong intention, and is usually secretive

Solution

- a. Listen to them and attempt to introduce like-minded people
- b. Perseverance and patience is the key

Copyright ©2023 Parash Fozdar, Strategy For Positive Impact - All Rights Reserved.

Fig. 6

SPI in Psychology example #2

Is it okay to not Care about what other people think?

Observation

People who do not care fail to listen and observe hence miss an opportunity to self-improve

Explanation

- a. Increased curiosity to question and listen generates Self-awareness and Perspectives
- b. Corporations use survey and feedback on customer or perform studies to infer on new product development
- c. Randomized experiment like the most common A/B testing
- d. Experiment performed by selecting Influencers with controlled factors along with various degrees of trust and assumptions
- e. Often Machine Learning techniques are used for Analysis of large data i.e. big data

Inference

People's thought process i.e. perspectives contribute to self-awareness

Fig. 7

SPI in Psychology example #3

Can one truly put others' interest above their own and still be ethical?

Observation

Human is unhappy when forced to act against their will
Failure occurs as ethics become invisible or lost

Explanation

Illustration using Formal and Informal setting:

Informal as Family:

Asian family force their kids to perform at school and be a professional like a Doctor or an Engineer
Result is eventual failure and loss of career direction

Formal as Corporate:

An organization trying to excel at a product to gain competitive advantage in market for profitability which has:

- a. Insufficient research to identify relevance to organization's purpose
- b. Lack of investment to develop internal expertise

Result is failure

Inference

Ethics fade away as:

- a. Human when forced against their interest get discouraged and productivity stops
- b. Unhappiness from adopting wrong direction harm community
- c. Misalignment of purpose in organization cause social harm

Fig. 8

SPI in Arts and Science example #1

Avoid taking advantage of others in a position of privilege or power?

Observation

Culture and hierarchical structure in an organization explains this behavior or bias

Explanation

- a. Self-Awareness and Self-Evaluation with Ethics while managing Bias
- b. Active listening with collaboration and 2-way communication allows applying all perspectives to evaluate bias

Illustration in formal and informal environment:

Formal as Professional set-up

Separate individuals into different hierarchy where there is no mix of Power and influence

Informal as Family

Use fairness and remove any bias by applying constant perspectives with empathy

Inference

- a. Self-awareness of Legitimate Power to Understand and handle relationships with Ethics while evaluating bias
- b. Empower others by practice to create a positive vibe contributes to culture

Fig. 9

SPI in Arts and Science example #2

After self-realization by human of their harmful and counterproductive behavior, can it be changed?

Observation

Human who has no Ethics with background of harmful culture is difficult to change, yet possible to attempt

Explanation

Premise:

- a. Human with conscious mind trained to be harmful, will need a reset and re-train like a new born
- b. Chances are subconscious-ego will keep interfering with factors of age and experience

Attempt:

- a. Revoke power and wealth from this human
- b. Observe the human behavior and willingness to accept the change

Inference

Renewal attempt will gift the human with time to self-realize and gain self-awareness

Fig. 10

SPI in Arts and Science example #3

Can human behavior be learnt?

Observation

Human behavior is understood more efficiently by observations

Explanation

Illustration:

New-born self-learns by observation without language understanding power

Hence,

An adult human is influenced by novel ideas and visuals with process to observe, learn and practice

Inference

Human behavior understood by their environment and culture

Fig. 11

SPI in Finance, Economics and Marketing example #1

Americans are very selfish, is it true?

Observation

Selfish or Selfless behavior is seen in all continents across the World

Explanation

Any Behavior is advertised by population movement and communication channels, amplified by easy access to social media

Difference occurs as population moves:

Developing nations where population is native or non-immigrants, more family component, small displacement

vs.

Developed nations where large population is immigrants, less family component, due to large displacement in pieces

Results:

Developing nations:

- a. Human tends to not readily advertise their selfishness or dissatisfaction to: relatives, family and the world
 - b. Fear and bias for behavioral qualities inheritance
- vs.

Developed nations:

- a. Behavior disturbances get readily communicated to people around plus homes across continents
- b. New innovation and technology fuel propagation

Inference

- a. Selfishness exist everywhere, social network dynamics controls the degree of imbalance
- b. Behavior is supported by human myth: family is more trustworthy than friends

Fig. 12

SPI in Finance, Economics and Marketing example #2

Why do people work together?
Is it to satisfy need for social interaction or a larger purpose?

Observation

People work together to achieve and sustain a purpose, which a single entity or person is unable to fulfill

Explanation

To achieve a Purpose people work together facilitated by Social Interaction

Need:

- a. Diversity allows sharing perspectives to solve problems effectively and efficiently
- b. Different expertise and experiences allow to share mindset of a coach, mentor or sponsor for decision making
- c. Social interaction acts as mechanism for delivery of purpose

Inference

Purpose is achieved by a Culture of Social Interaction

Fig. 13

SPI in Finance, Economics and Marketing example #3

What are some theories about how people think and act?

Observation

Human action and thoughts are known to be influenced by their prior experiences

Explanation

It is believed that past history of actions based on situational occurrences can be used to predict the future behavior of human

Hence, due to this Belief-Perseverance,

Social Media believes in profiling every human

However,

Fact about a human is:

- a. Actions are influenced by present experiences plus positive or negative influencers
- b. Thought Process is influenced by new emotions applied to past behavior

Inference

- a. Actions are Unpredictable
- b. Thought process is approximated using past data with assumption that emotions are a constant

Fig. 14

SPI in Mentoring example #1

Trust vs. Antitrust: How to protect from exploitation?

Observation

Understand the ask, gain clarity on the expectations vs. requirements

Explanation

Trust:

- a. Self-awareness to honestly evaluate Ability and Well-being with Expectations can build Trust
- b. Understand expectation by collaboration and a True Dialog

Antitrust:

- a. Trust once developed needs monitoring
- b. Excessive overconfidence results in Confirmation Bias and creates Antitrust

Inference

Trust is gained by Experience, however uncontrolled trust forms belief that results in Antitrust

Copyright ©2023 Parash Fozdar, Strategy For Positive Impact - All Rights Reserved.

Fig. 15

SPI in Mentoring example #2

Respond to an insult done in meetings or similar setup?

Observation

Insult occurs due to overconfidence or bias or power

Explanation

- a. Involve the party in conversation, by asking questions around the topic of discussion
- b. Often insult is conducted on a premise with no clarity and understanding
- c. During Communication:
 - Often experience unwillingness to answer or haste or digress
 - Visible signs of support for perpetrator from Legitimate Power
- d. Difficult to evaluate such situations as the individual tend to surround themselves with like-minded manipulative people

Inference

Practice Ethics and Honesty in the above approach

Fig. 16

SPI in Leadership example #1

Layoffs, corporate overhead response, cutbacks: Fire developer?

Observation

System Explicit Components:

- a. Strength: Expert Power (Team members)
- b. weakness: Bureaucracy with Coercive and Legitimate Power (Managers)

System Implicit Components:

- a. Sponsor: System Leadership

Explanation

Expert Power Approach:

- a. As coach to self, with no mentor nor referent power, recognize System is on path to self-destruction (zero productivity)
- b. With Human Ethics and Courage show Sponsor, this image of System self-destruction

Decision-Making:

If Sponsor acknowledges this problem and has true leadership ability, then Sponsor join hands with Expert Power for System Correction

Expert Power Reward:

- 1. Empower others and Exit self-destruction path
- or
- 2. Empower others to join hands with Sponsor towards System Correction

Inference

Opportunity for Expert Power to model and grow their values and leadership ability

Fig. 17

SPI in Leadership example #2

Homeless population problem in U.S. Cities

Current State Observation

Most cities design new resources and capabilities to:

- a. Hire outreach workers to identify homeless needs
- b. Partner with hospital to understand frequent emergency room visits
- c. Implement data sharing and information power

Proposed State and Approach

- a. Partner with present city psychologist, city departments i.e. Mental Health, Sanitation and others to develop awareness and understand situation
- b. Form alliance with grocery chains (on-site and online)
- c. Employ displaced or homeless on hourly wage, to work with homeless as they have first-hand experience
- d. Relieve city services e.g. police and fire departments, to increase focus on their Purpose
- e. Engage ESG corporations (public and private) on prospect to apply "S" of ESG, to fund and rehire qualified and displaced workforce

Inference

- 1. Homelessness answered proactively not reactively
- 2. Empower People Correction to increase job meaningfulness

Fig. 18

SP1 in Leadership example #3

Stop to Stereotype People

Observation

Everyone unknowingly falls in a Stereotype Trap due to broad society and diverse cultures

Definition

Stereotypes are often unfair views or untrue beliefs with characteristics:

Religious and Atheistic, Sexual-orientations (homo, bi, hetero), Countryside and City, Parents and Step-Parents, Bullied and Bullied-others, Lonely and Popular

Diversity is people-variety with respect to:

- a. Demographics: Race, Ethnicity, Age, Gender, Color
- b. Functional: Knowledge, Expertise, Personality

Proposed Approach

Use Diversity to Dissolve Stereotype

Use Diversity:

- a. Problem-Solving ability by Inclusion (of stereotype) to share perspectives with empathy
- b. Opportunities emerge with imbalance in assets or equity for success

To

Dissolve Stereotype:

- a. Courage to question the Stereotype without fear or shame will create Conflicts
- b. Conflicts are addressed by negotiations, trade-offs and trust

Inference

1. Begin to embrace Diversity
2. Create a pandemic-like (exponential) influence
3. Leading to inheritance of Diversity to kill Stereotype

Fig. 19

STRATEGY FOR POSITIVE IMPACT**APPROACH**

- [0001] Formulate strategy to produce positive impact by nomenclature: Strategy For Positive Impact (SPI)
- [0002] Apply SPI, to identify need with interpretation and derive positive impact on society and environment, as proof
- [0003] For SPI in
 - [0004] Psychology:
 - [0005] Refer to, FIG. 1 is SPI in Psychology
 - [0006] Arts and Science:
 - [0007] Refer to, FIG. 2 is SPI in Arts and Science
 - [0008] Finance, Economics and Marketing:
 - [0009] Refer to, FIG. 3 is SPI in Finance, Economics and Marketing
 - [0010] Mentoring:
 - [0011] Refer to, FIG. 4 is SPI in Mentoring
 - [0012] Leadership:
 - [0013] Refer to, FIG. 5 is SPI in Leadership

COMPONENTS

- [0014] Need
- [0015] Explanation
- [0016] Impact

NEED

- [0017] Apply SPI to analyze behavior and anomaly by question

BEHAVIOR

- [0018] Fear
- [0019] excessive attempt to converse
- [0020] fight loneliness
- [0021] solitude for avoidance
- [0022] seclusion with withdrawal
- [0023] Thrive
- [0024] sacrifice of interest
- [0025] achieve goal by external coercion
- [0026] take advantage from position of social privilege
- [0027] impair ability with divide
- [0028] Augment
- [0029] interpret to grasp lifeform
- [0030] comprehend to classify egocentricity
- [0031] predict on basis of thought and activity
- [0032] exploitation by bias
- [0033] Strive
- [0034] mask evil in self
- [0035] conceal toxic for contamination
- [0036] utilize insult as shield, to accomplish
- [0037] Embody
- [0038] stun to propagate misery
- [0039] posture reactively to resolve, for gain
- [0040] develop untrue belief by characteristics, for stereotype trap

ANOMALY

- [0041] Acclaim
- [0042] recognize immorality to defer
- [0043] research arrangement for evident or obvious
- [0044] amplify fallacy with loyalty anchor
- [0045] Sprout

- [0046] obscure requirement with unreasonable expectation
- [0047] persevere by belief to profile
- [0048] retain advantage by growth sham
- [0049] adopt archaic grief or method to detain
- [0050] obstruct by no synergy to hinder
- [0051] Burgeon
- [0052] bias accrue by echelon to embrace power
- [0053] support for perpetrator by legitimate power
- [0054] misdirect invest or expertise
- [0055] Exhaust
- [0056] stagnate capability by suppression of detail or data
- [0057] dismiss or poach, for benefit
- [0058] retain impropriety in allocation of asset
- [0059] Fail
- [0060] pop with strenuous defense rational
- [0061] deteriorate productivity
- [0062] declare disorder or ailment for inability to solve
- [0063] evade accountability
- [0064] define exclusion for write-off inclusion
- [0065] repeat or replicate for claim

ANALYSIS

- [0066] Human behavior and anomaly in system, indicate harm

EXPLANATION

- [0067] Apply SPI to inquire and learn from need by example

EXAMPLE

- [0068] Arrangement by congruity for
 - [0069] Psychology
- [0070] Refer to, FIG. 6 is SPI in Psychology example #1
- [0071] Refer to, FIG. 7 is SPI in Psychology example #2
- [0072] Refer to, FIG. 8 is SPI in Psychology example #3
 - [0073] Arts and Science
- [0074] Refer to, FIG. 9 is SPI in Arts and Science example #1
- [0075] Refer to, FIG. 10 is SPI in Arts and Science example #2
- [0076] Refer to, FIG. 11 is SPI in Arts and Science example #3
 - [0077] Finance, Economics and Marketing
- [0078] Refer to, FIG. 12 is SPI in Finance, Economics and Marketing example #1
- [0079] Refer to, FIG. 13 is SPI in Finance, Economics and Marketing example #2
- [0080] Refer to, FIG. 14 is SPI in Finance, Economics and Marketing example #3
 - [0081] Mentoring
- [0082] Refer to, FIG. 15 is SPI in Mentoring example #1
- [0083] Refer to, FIG. 16 is SPI in Mentoring example #2
 - [0084] Leadership
- [0085] Refer to, FIG. 17 is SPI in Leadership example #1
- [0086] Refer to, FIG. 18 is SPI in Leadership example #2
- [0087] Refer to, FIG. 19 is SPI in Leadership example #3

HARM

- [0088] Observation on need point out wrong
 - [0089] Exploit
 - [0090] distribute power for imbalance

[0091] affect work with vicious domain
 [0092] instigate disturbance with:
 [0093] bias by inherent menace for defamation
 [0094] fear by coercion from authority
 [0095] Surrender
 [0096] forgo opportunity to learn and improvise, by pressure
 [0097] pamper slow decision-making by inaccessibility
 [0098] lose productivity
 [0099] disconnect by misalignment of interest or expertise with goal
 [0100] manifest friction by inaptitude, and mislead extrinsic community
 [0101] rocket non-ethics by disinclination for unsuitable
 [0102] Scam
 [0103] hoax for adherence to myth
 [0104] produce directive to develop troublesome predictive analysis
 [0105] seize by appraisal of:
 [0106] communication tact
 [0107] confidence level
 [0108] Fraud
 [0109] pestilence of immorality
 [0110] abide to bully
 [0111] amass alike to crowd and coerce for acquisition
 [0112] Scandal
 [0113] circle to dispose talent by convolution for contortion, to exhibit bureaucracy
 [0114] exploit with overconfidence and belief, for bias as norm
 [0115] replicate nonfunctional by stratum with collusion, for distress

POSITIVE

[0116] Analyze observation to identify and strengthen righteous
 [0117] Upbeat
 [0118] endeavor to fight and achieve goal
 [0119] develop perspective for awareness
 [0120] existence of social obedience
 [0121] Respect
 [0122] pitch to predict movement or speculate, is futile
 [0123] ignorance and negligence devise belief for malpractice, ensue confirmation on bias for antitrust
 [0124] expertise to perceive destruction with:
 [0125] attempt to correct
 [0126] empower and exit
 [0127] Effort
 [0128] organism indoctrinate
 [0129] learn by percept
 [0130] understand by environment
 [0131] spot attribute for misconduct: haste, digression, idiocy, oblivion
 [0132] simplify with reproducibility to deliver by: diversity, expertise, agile-mindset
 [0133] propose alternate with proactive approach to raise efficiency and effectiveness
 [0134] Vitalize
 [0135] advance art for benevolent-inventful.
 [0136] use as tool: machine to learn, software to assist

[0137] fuel science for balance
 [0138] employ math and statistics for simplification
 [0139] engineer for productive
 [0140] analyze data for examples to derive information and context
 [0141] Ripple
 [0142] develop evaluation for bias by: listen, collaboration
 [0143] accept viewpoint with affinity, to nurture trust
 [0144] curiosity to overcome fear
 [0145] courage to inquire
 [0146] negotiate to resolve conflict

ACTION

[0147] Apply SPI for inquiry on positive
 [0148] Train
 [0149] facilitate experience or disagreement, for trust
 [0150] listen, spot and prevent attack from malicious
 [0151] discipline wrong by revocation of power
 [0152] realize by renewal attempt
 [0153] ease availability of factual data for fulfilment
 [0154] embrace to inherit diversity and kill stereotype
 [0155] Empower
 [0156] foster awareness:
 [0157] explore perspective
 [0158] interpret or discuss thought process for experimental
 [0159] cultivate creative:
 [0160] reward and redeem for novel
 [0161] extend meaningfulness
 [0162] gear emotion component as prerequisite for change
 [0163] enable expert to model leader capability
 [0164] Deploy
 [0165] propel ethics and honesty for progress
 [0166] equity for well-being
 [0167] distribute influence and power
 [0168] use fairness by perspective with empathy
 [0169] monitor dependence for moderation to believe
 [0170] support virtuous for integrity
 [0171] align passion, interest and purpose

CONDUCT

[0172] Continual advance with well-being, by ethical advocacy, mentoring and leadership, for creative and prosperous growth
 [0173] Application of SPI, to assess harm and reinforce positive with commitment by action for impact

IMPACT

[0174] Iterative application of SPI with analysis on need and inquiry on harm, identifies positive conduct to realize essential balance in habitat

STATEMENT FOR NO NEW MATTER

[0175] This Statement confirms that this Substitute Specification contains no new matter, except addition, brief description of drawings

1. Strategy For Positive Impact is applicable in any field for positive impact, such as essential conduct for balance with progress and growth in habitat.

2. Application of Strategy For Positive Impact on need point out wrong, such as question by example on behavior and anomaly indicate harm in environment:

- a. Exploitation such as toxic bias and immorality, misfire on survival;
- b. Outplay system, such as perpetration and misdirection, for deterioration.

3. Iteration of Strategy For Positive Impact on wrong identify right action for capable, such as analysis and inquiry on harm with observation derive true conduct for balance:

- a. Guard for moral rights such as spot misconduct, hoax and bias in power for punishment;
- b. Aid for viable creative such as consensus on passion with ability for integrity and trust, with effort in honest direction;
- c. Growth for advancement, such as inheritance of diversity and availability of factual, towards believable and virtuous progress.
