(57) **CLAIM**

The ornamental design for a display screen or portion thereof with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image of a first embodiment of a display screen or portion thereof with an animated graphical user interface, showing our new design;

FIG. 2 is a second image thereof;

FIG. 3 is a front view of a first image of a second embodiment of a display screen or portion thereof with animated graphical user interface, showing our new design;

FIG. 4 is a second image thereof;

FIG. 5 is a front view of a first image of a third embodiment of a display screen or portion thereof with animated graphical user interface, showing our new design;

FIG. 6 is a second image thereof;

FIG. 7 is a front view of a first image of a fourth embodiment of a display screen or portion thereof with animated graphical user interface, showing our new design;

FIG. 8 is a second image thereof;

FIG. 9 is a front view of a first image of a fifth embodiment of a display screen or portion thereof with animated graphical user interface, showing our new design;

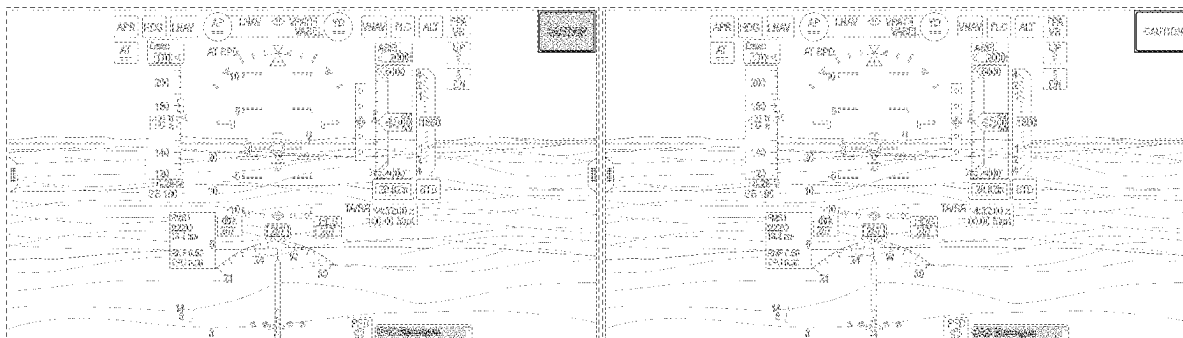

FIG. 10 is a second image thereof;

FIG. 11 is a front view of a first image of a sixth embodiment of a display screen or portion thereof with animated graphical user interface, showing our new design; and,

FIG. 12 is a second image thereof.

The outer broken line perimeter showing the display screen forms no part of the claimed design. The remaining broken lines, which make up portions of the graphical user interface, form no part of the claimed design. The appearance of the animated image sequentially transitions between the images shown in FIGS. 1 and 2. The appearance of the animated image sequentially transitions between the images shown in FIGS. 3 and 4. The appearance of the animated image sequentially transitions between the images shown in FIGS. 5 and 6. The appearance of the animated image

(Continued)

sequentially transitions between the images shown in FIGS. 7 and 8. The appearance of the animated image sequentially transitions between the images shown in FIGS. 9 and 10. The appearance of the animated image sequentially transitions between the images shown in FIGS. 11 and 12. The process or period in which one image transitions to another forms no part of the claimed design. The sections of the graphical user interface that have stippling indicate a contrast of appearance and form a part of the claimed design.
