(57) **ABSTRACT**

The Continuous Success Model is generalized to work in any field for progress and growth. The model empowers in identification of generalized goals to achieve and sustain the Success, to develop a Model representation to define path and direction towards achieving goals, process to overcome the problems encountered in the Success path, continuity by iterative actions to measure and quantify the Success at every step, and, self-reward ability to sustain the Success. The Continuous Success Model Rewards with the Leadership capability towards the social well-being

The Continuous Success Model			
Action To Success		Evaluation Steps:	Quantify Success
		1. Experiment 2. Identify Mistake 3. Iterate 4. Apply Team Effort 5. Identify Rewards	
1	Strategic and Agile Approach to Life	➤ Create, Execute and Contribute to the Vision ➤ Manage Risk / Resilience ➤ Maintain Positivity	✓ Ability to create or contribute to Vision or thought-process, articulate the vision in chunks. Prepare a long-version and short-version of Vision ✓ Readily visible Risk for each chunk. Evaluate Risk individually and in combinations ✓ Constant development of Self-Awareness using Action #2, apply Empathy while managing emotions
2	Develop and Maintain a Mindset	➤ Growth ➤ Value Generation ➤ High Ethics	✓ Ability to apply Growth Mindset while managing anxiety and fear ✓ Ability to search for opportunity while maintaining human, work, social and culture ethics
3	Social Contribution	➤ Volunteer ➤ Mentor ➤ Understand	✓ Ease of Mentoring, or even volunteer to distribute knowledge to diverse individuals ✓ Ability to apply Understanding, by practicing Self-Evaluation, before Real-World-Evaluation

Fig. 1

CONTINUOUS SUCCESS MODEL

PLAN TO SUCCESS

Approach

- [0001] Develop and Maintain a Mindset
- [0002] Strategic and Agile Approach to Life
- [0003] Social Contribution
- [0004] All the above together, fuels my motivation in maintaining Success.

Goals

Develop and Maintain a Mindset of:

- [0005] Growth
- [0006] Value Generation
- [0007] High Ethics

Strategic and Agile Approach to Life:

- [0008] Manage Risk/Resilience
- [0009] Maintain Positivity
- [0010] Create, Execute and Contribute to the Vision

Social Contribution:

- [0011] Volunteer
- [0012] Mentor
- [0013] Understand

Single Target Goal

- [0014] I would launch my journey to gain Success by approaching the below task
- [0015] Create, Execute and Contribute to the Vision

Pros

- [0016] This Goal will enable me to start thinking in the direction to Success
- [0017] This will become a Holistic approach which allows me to think in direction of my interest
- [0018] A Ripple-Effect will be generated. This will produce chunks, acts as pieces of puzzle, towards short-term Rewards
- [0019] This goal will provide a shape for my Social Contribution Effort while gaining the right Mindset characteristics
- [0020] As the Success direction is auto-defined, Short-term gains would be visible in chunks

Cons

- [0021] Long-term effect will be invisible
- [0022] Challenging to find optimal path, will require iterative refinement at every stage

Personal Gain

- [0023] Self-Confidence boosted for every achievement in the approach to Success
- [0024] Replicate the approach, apply probabilities and develop Mental Representations to maintain Success
- [0025] Rework the proven approach to address larger goals

Feasibility

- [0026] Most Successful Personalities have achieved their Goal, with variable complexities, however the approach is always customized and agile

**PATH TO REALIZE AND MAINTAIN
CONTINUOUS SUCCESS**

- [0027] Refer to FIG. 1

DISTRACTION TO PROGRESS

- [0028] Possible Distraction to Progress, can occur, by constant focus on Value Generation Mindset
- [0029] As long as the direction is evaluated intermittently; and it is towards the Goal, the short-term rewards are visible of achieved, then this task may be eliminated from the equation to Success

Reward towards Self-Awareness

- [0030] Discomfort is key driver Success
- [0031] Well-Being significance, must be realized and managed by tactful balance of Resiliency (i.e. Stress, persistence)

1. The Continuous Success Model is generalized to work in any field for progress and growth

2. The model empowers:

- a. Identification of generalized goals to achieve and sustain the Success
- b. A Model representation to define path and direction towards achieving goals
- c. Process to overcome the problems encountered in the Success path
- d. Continuity by iterative actions to measure and quantify the Success at every step
- e. Self-reward ability to sustain the Success

3. The Continuous Success Model Rewards with the Leadership capability towards the social well-being
