(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface for flight control, as shown and described.

DESCRIPTION

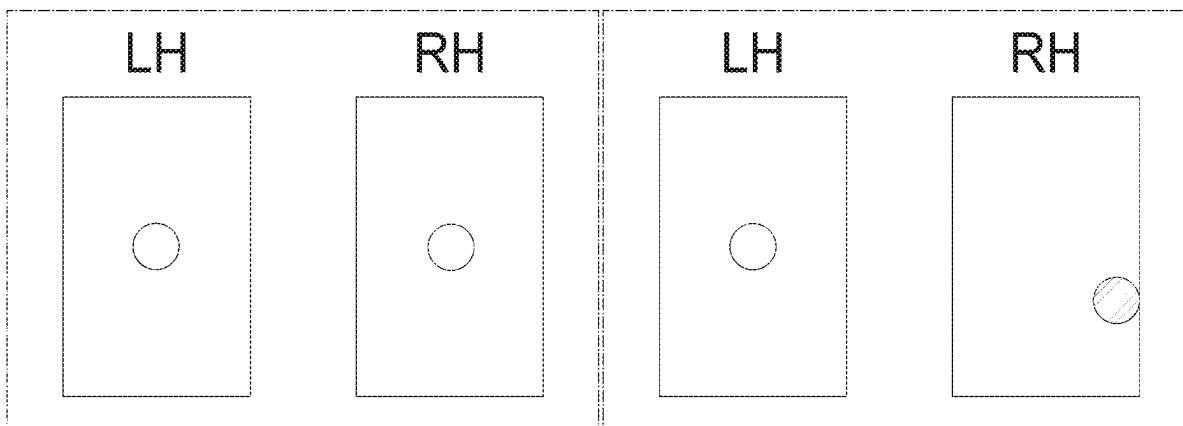

FIG. 1 is a front view of a first image in a sequence of a display screen with animated graphical user interface for flight control showing my new design; and, FIG. 2 is a front view of a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines of uneven length show the display screen and form no part of the claimed design.

The lined shading in FIG. 2 indicates a contrast in appearance.
