Description

- (1) FIG. 1 is a front view of the first image in a sequence of a first embodiment of a display screen with animated graphical user interface showing our new design;
- (2) FIG. 2 is a front view of the second image thereof;
- (3) FIG. 3 is a front view of the first image in a sequence of a second embodiment of a display screen with animated graphical user interface showing our new design; and,
- (4) FIG. 4 is a front view of the second image thereof.
- (5) The evenly-spaced broken lines are included for the purpose of illustrating elements of the graphical user interface that form no part of the claimed design. The subject matter of this patent includes a process or period in which an image sequentially transitions into another image. This process or period forms no part of the claimed design.

Claims

The ornamental design for a display screen with animated graphical user interface, as shown and described.
