CLAIM

The ornamental design for an ergonomic irrigation fitting as shown and described.

DESCRIPTION

FIG. 1 is a first top perspective view of a first embodiment of an ergonomic irrigation fitting, according to my new design;

FIG. 2 is a second top perspective view of the ergonomic irrigation fitting;

FIG. 3 is a first bottom perspective view of the ergonomic irrigation fitting;

FIG. 4 is a second bottom perspective view of the ergonomic irrigation fitting;

FIG. 5 is a front elevational view of the ergonomic irrigation fitting;

FIG. 6 is a rear elevational view of the ergonomic irrigation fitting;

FIG. 7 is a top plan view of the ergonomic irrigation fitting;

FIG. 8 is a bottom plan view of the ergonomic irrigation fitting;

FIG. 9 is a left side elevational view of the ergonomic irrigation fitting;

FIG. 10 is a right side elevational view of the ergonomic irrigation fitting;

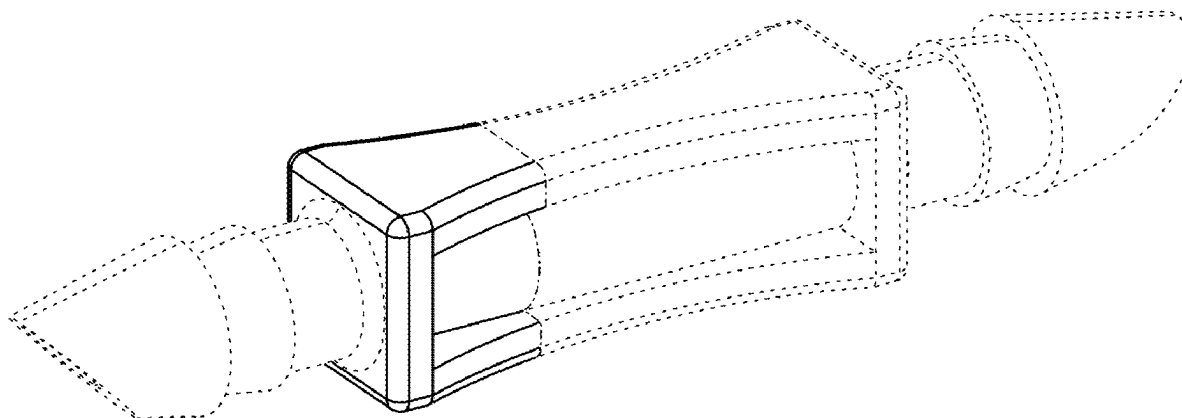

FIG. 11 is a top perspective view of a second embodiment of the ergonomic irrigation fitting, according to my new design;

FIG. 12 is a top perspective view of a third embodiment of the ergonomic irrigation fitting, according to my new design; and,

FIG. 13 is a top perspective view of a fourth embodiment of the ergonomic irrigation fitting, according to my new design.

The dash-dash broken lines in the figures are for the purpose of depicting portions of the ergonomic irrigation fitting that form no part of the claimed design. The dot-dash broken lines define the bounds of the claimed design, the boundaries defined by the dot-dash broken lines forming no part of the claimed design. Only a single view is provided in connection with the second, third, and fourth embodiments of the

(Continued)

ergonomic irrigation fitting because the claimed design is identical in each, and the views needed to illustrate the claimed design are presented in connection with the first embodiment. Thus, the second, third and fourth embodiments differ from the first embodiment only with respect to the portions not claimed therein.
