(57) **CLAIM**

The ornamental design for a medication administration indicator, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view from the front of a medication administration indicator;

FIG. 2 is a perspective view from the rear of the medication administration indicator of FIG. 1;

FIG. 3 is a front view of the medication administration indicator of FIG. 1;

FIG. 4 is a rear view of the medication administration indicator of FIG. 1;

FIG. 5 is a right side view of the medication administration indicator of FIG. 1;

FIG. 6 is a top view of the medication administration indicator of FIG. 1;

FIG. 7 is a perspective view of the medication administration indicator of FIG. 1 shown attached to a medication container;

FIG. 8 is a front view of the medication administration indicator of FIG. 1 shown attached to a medication container;

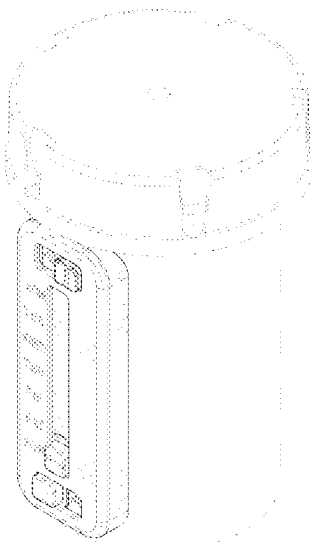

FIG. 9 is a right side view of the medication administration indicator of FIG. 1 shown attached to a medication container; and,

FIG. 10 is a bottom view of the medication administration indicator of FIG. 1 shown attached to a medication container.

The features shown in broken lines in FIGS. 1, 3, and 5-10 are for illustrating unclaimed aspects or environmental structure that form no part of the claimed design. The left side is a mirror image of the right side. The indicator markers are shown in particular positions in FIGS. 1-10 but are moveable to other positions along their respective slide tracks.

More generally, the invention pertains to an ornamental design for an article of manufacture. As indicated in the title, the article of manufacture to which the ornamental design has been applied is a medication administration indicator.
