(57) **CLAIM**

The ornamental design for a beverage bottle as shown and described.

DESCRIPTION

FIG. 1.1 is a front view of a beverage bottle showing the new design according to a first embodiment;
FIG. 1.2 is a right side view of FIG. 1.1;
FIG. 1.3 is a top view of FIG. 1.1;
FIG. 2.1 is a front view of a beverage bottle showing the new design according to a second embodiment;
FIG. 2.2 is a right side view of FIG. 2.1;
FIG. 2.3 is a top view of FIG. 2.1.

1. The lines merging into circles at the bottom of the bottle represent the knurling of the bottle's base.
2. The short solid line segments that cover most of the bottle surface represent the textured surface of the bottle, intended to give the visual and tactile impression of 'citrus peel,' as typically found on citrus fruits like lemons. This texture is integral to the ornamental design and conveys a natural, non-uniform appearance.

(Continued)

3. The broken lines in the drawings represent portions of the bottle that form no part of the claimed design.

1 Claim, 2 Drawing Sheets
