Description

(1) FIG. 1 is a front view of a display screen or portion thereof with graphical user interface showing our new design; and,

(2) FIG. 2 is an enlarged partial view thereof according to the broken line rectangle noted in the upper left portion of FIG. 1.

(3) The dot-dash broken lines illustrate a display screen or portion thereof. The two pairs of wavy broken lines passing through the graphical user interface illustrate symbolic breaks in the article.

The remaining broken lines illustrate portions of the graphical user interface. None of the broken lines forms part of the claimed design. The appearance of any portion of the article between the wavy break lines forms no part of the claimed design.

(4) The different stippled shading illustrates a contrast in appearance, where one density of shading contrasts with another density of shading.

Claims

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.
