Description

(1) FIG. 1 is a front top perspective view of a computing device for a surgical system, showing our new design;

(2) FIG. 2 is a rear top perspective view of the computing device for a surgical system of FIG. 1;

(3) FIG. 3 is a front bottom perspective view of the computing device for a surgical system of FIG.

1;

- (4) FIG. 4 is a front elevational view of the computing device for a surgical system of FIG. 1;
 - (5) FIG. 5 is a rear elevational view of the computing device for a surgical system of FIG. 1;
 - (6) FIG. 6 is a side elevational view of the computing device for a surgical system of FIG. 1;
 - (7) FIG. 7 is a side elevational view of the computing device for a surgical system of FIG. 1, the side elevational view of FIG. 7 being opposite to the side elevational view of FIG. 6;
 - (8) FIG. 8 is a top plan view of the computing device for a surgical system of FIG. 1; and,
 - (9) FIG. 9 is a bottom plan view of the computing device for a surgical system of FIG. 1.
- (10) The evenly-spaced broken lines in the drawings are included for purpose of illustrating portions of the computing device for a surgical system that form no part of the claimed design. The dot-dash-dot broken lines in the drawings are included for the purpose of defining the boundary of the claim, it being understood that the region between the dot-dash-dot broken lines and the dot-dash-dot broken lines themselves form no part of the claimed design.

Claims

The ornamental design for a computing device for a surgical system as shown and described.
